

SCALEBLASTER[®]

WATER CONDITIONER

APPLICATIONS

Sustainable Solutions to Hard Water Problems

CLM-515

Educational Institutions

Educational Institutions

Cooling towers

Lime scale deposit control on the tower fill, sump tank, spray headers, valves, pumps and pipes.

Chillers

Lime scale deposit control on the heat exchange surfaces.

Hot water heaters

Lime scale deposit control on the heating coil and tank.

Boilers

Lime scale deposit control on boiler fire tubes, condensation tank, pumps, pipes and valves.

Laundry

Lime scale deposit in steam ironing machines, washing machines. There will be reduced surface tension of the water due to the **ScaleBlaster system**, resulting in the water requiring less detergent.

Food Service

Lime scale deposit in dishwashers, ice makers, steam tables. Also, there will be deposit control in drains where greasy liquids are disposed of.

Swimming Pools

Lime scale deposit in the filtration equipment and pool walls will be eliminated by the ScaleBlaster system.

Science Labs

Lime scale control for water used in specialized equipment.

Greenhouses

Lime scale control in drip tubes, misters, spray headers, valves, hydroponic beds, aquaponic beds, and fertilizer application systems.

Waste water treatment

Lime scale control in pumps, tanks, pipes, valves, and sensors.

Environmental issues

Environmental issues and the “*going green*” are important standards set by our fine institutions.
