

# SCALEBLASTER®

WATER CONDITIONER

# APPLICATIONS

*Sustainable Solutions to Hard Water Problems*

CLM-550

**Restaurants**

# Restaurants

## **Entire Piping System**

The entire building's pipe system will be cleaned out of scale buildup. Better tasting water and flow rate. No need to clean out pipes full of scale, which could cost tens of thousands of dollars.

## **Water heater tanks**

Scale control on heating coil and tank will allow for the water heaters to work more efficiently resulting in huge energy savings.

## **Dishwashers**

Lime scale buildup in the dishwasher lines and on glassware and dishes will be reduced.

## **Steamers**

Your steamer will require little or no maintenance for scale buildup.

## **Ice Machines**

Scale deposits cause cubes to be cloudy and clogs in the water flow. **ScaleBlaster**<sup>®</sup> reduces filter clogs, biofilm and contaminants. Maintenance and downtime are also reduced and equipment lasts longer.

## **Filtration**

Water filters & RO membranes work more efficiently, providing for extended filter life.

## **General cleaning**

Huge savings in all phases of cleaning including the bathrooms and in the kitchen – because there is less scale buildup in toilets, sinks, nozzles and faucets. Reduced labor and savings in cleaning chemicals will be realized.

## **Drinking water, coffee machines, soda dispensers**

Soda dispensers will operate more efficiently, the tap water will taste much better (the breeding ground for bacteria- lime scale, will be gone). Coffee machines will use water with calcium in it, improving the taste dramatically over a water softener.

## **HVAC**

Protect heating systems boilers/furnace from scale build up in pump & piping, resulting in significant energy savings.
